Implement Aviation  
Fatigues Risk  
Management  
Processes

---

## Comply with regulations

### COURSE OVERVIEW

This course involves the skills and knowledge required to implement aviation fatigue risk management processes, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes identifying, controlling, monitoring and reviewing the effectiveness of fatigue risk management processes as part of a safety management system (SMS).

Work involves managing the effects of fatigue on operational objectives using an SMS within a variety of operational contexts within the Australian aviation industry.

## Learn how to manage effects of fatigue

### COURSE PROGRAM

This course addresses aviation non-technical skill requirements (mental, social and personal-management abilities) related to safety management duties that complement the technical skills of aviation personnel and contributes to safe and effective performance in complex aviation operational environments.

---

This online course contains the following modules:

1. Introduction to fatigue management
2. Scientific principles for fatigue management
3. Operational knowledge and experience
4. Fatigue reporting and subjective measures of fatigue
5. Evaluating the contribution of fatigue to safety events
6. Duty/rest guidelines for business aviation
7. Fatigue case study
8. Summary
